<b>Total Represented</b>		<b>50</b>

**Summary:**

**Testifiers:**

**1. Greg Nelson-Pneumat Systems, Inc.**

ATF- Mr. Nelson sells a product that the ATF has classified as an explosive. Mr. Nelson is contesting this classification. He has had the product tested by independent laboratories that have stated that the product is not an explosive. In addition he states that the DOT has determined that the product is not an explosive for shipping purposes. Mr. Nelson states that if the product is explosive, then his customers must obtain a license to handle an explosive product. This is a disincentive to purchase the product.
